Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S.

Patent 4,013,434 to Kronenberger et al., in view of U.S. Patent 6,125,641 to Kim et al.

Kronenberger discloses applicant's basic inventive concept, a method and a system for cleaning dampers in a two-compartment refrigerator (10), wherein a control damper (72, 74) is attached to the cover plate (40) selectively for throttling either the right edge openings (62) or the left edge openings (64) by merely being turned end-for-end thus allowing for ready replacement by the customer for purposes of cleaning or the like (col 3, lines 15-33), substantially as claimed with the exception of using a controller, which specifies the set number of times in a set interval. Kim (col 8, lines 24-27) shows a set interval timed controller for controlling the baffles to be old in the refrigeration art. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made from the teaching of Kim to modify the system of Kronenberger, by adding a damper a controller in order to automatize the system and improve its efficiency.

Allowable Subject Matter

3. Claims 1-14 and 21-22 are allowed.
4. Claims 16, 17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 5,996,361 to Bessler, Warren F. et al. teaches a defrosting system in a refrigerator.
